# MySQL 5.7 Post-EOL Support

Oracle no longer provides critical updates, security fixes, and vulnerability patches for MySQL 5.7. Remaining on MySQL 5.7 without support opens your database to potential vulnerabilities and non-compliance. However, rushing into a major upgrade presents its own set of challenges.

MySQL 5.7 Post-EOL Support from Percona offers a protective measure against these vulnerabilities, ensuring your MySQL 5.7 instances maintain both security and operational stability.

You'll benefit from:

- Expert-engineered fixes for detected, reproducible CVEs
- Consultative and operational support for up to three years post-EOL
- 24x7x365 hands-on monitoring, support, and issue resolution
- Reports on additional testing of CVEs
- Guaranteed SLAs

Plus, our experts can help you plan and execute your upgrade when you're ready.

## Proactive, always-on expertise

We're dedicated to ensuring the security and operational stability of your MySQL 5.7 deployments. Our team diligently reviews Oracle's quarterly Critical Patch Updates (CPUs) to detect CVEs and other vulnerabilities. This proactive process enables us to deliver lightning-fast builds and updates, ensuring the continued protection of your databases.

## Eligibility

Users of Percona software for MySQL 5.7 are eligible for MySQL 5.7 Post-EOL Support. This includes Percona Server for MySQL 5.7, Percona XtraDB Cluster 5.7, and Percona XtraBackup 2.4.

If you're using any other MySQL database, please reach out to us directly via the contact information below to discuss your coverage options.
