

Industry-leading Support

There's a reason Percona is one of the fastest growing companies and has the highest support renewal rates in the database management industry.

We offer the highest level of support at rates that won't break your budget.

What if I have DBaaS Vendor Support?

Percona Support augments your DBaaS vendor support with expert database service that goes well beyond the infrastructure itself. DBaaS radically simplifies server provisioning but has not removed the challenges of successfully deploying and utilizing modern database technologies.

Which DBaaS databases do you support?

Percona Support is available for MySQL, MariaDB, PostgreSQL, and MongoDB in Amazon RDS and Aurora, Google Cloud SQL, Microsoft Azure Database, and MongoDB Atlas.

Our key differentiators include:

- The Best SLAs in the Industry
- Guaranteed Technical Support Available 24x7x365
- Single Vendor Support for Multiple Databases
- Unlimited Server Options
- Flexible Payment Models

Percona Support for Database as a Service (DBaaS) Deployments

Database support you can count on – wherever you deploy your workloads

As the complexity of modern database deployments increases, more and more enterprises are deploying MySQL, MariaDB, MongoDB, and PostgreSQL within Database as a Service (DBaaS) environments like Amazon RDS and Aurora, Google Cloud SQL, Microsoft Azure Database, and MongoDB Atlas – but DBaaS environments require support and expert know-how to guarantee the best performance.

Percona Support helps you successfully navigate that complexity even within the cloud.

In the cloud, it is easier than ever to chase reliability and performance by scaling up to more powerful instances. However, this can simply delay resolution of underlying problems, while dramatically increasing your costs.

Percona Support helps you maximize resources while minimizing costs. Our user-friendly support team is accessible 24x7x365 online or by phone to:

- **Ensure you have a safe and optimal database configuration**
- **Assist you with using new features and technologies**
- **Work with you to identify and resolve performance problems caused by your queries, schema definitions, and indexing strategies**
- **Implement best practices for high availability, performance, and security**
- **Successfully use and deploy best-of-breed open source software beyond just the database server.**
- **Augment your existing team so you can focus resources on business-oriented initiatives**

You don't have to go it alone, and with Percona you don't have to question whether support is worth the cost – we'll prove that it is.

Percona offers three support options:

- **Essentials** – 24x7x365 support for MySQL, MariaDB, PostgreSQL, and MongoDB on DBaaS platforms
- **Advanced** – 24x7x365 support with 30-minute emergency response time, consultative support, Multi-AZ high availability and failover support, with optional Technical Account Manager
- **Premium** – 24x7x365 support with guaranteed 15-minute emergency response time and ongoing response time commitments. Includes custom login and screen sharing services and an assigned Customer Success Manager

More than simply a break/fix “insurance policy”, Percona's team of worldwide database experts are available 24x7x365 to help. Whatever your database and platform you choose, Percona Support is here to help your Database as a Service deployments succeed.
