PERCONA

Databases Run Better with Percona

Established in 2006, Percona is a trusted leader in open source database software, support, and services. With a proven track record of helping over 800 customers globally, Percona ensures that databases run efficiently and reliably.

From global enterprises to small businesses, organizations worldwide rely on Percona to unify, monitor, manage, secure, and optimize their databases. Simply put, Percona makes databases run better.

Open source tools and solutions

Drop-in replacements for MySQL, PostgreSQL, and MongoDB.*

Percona software for MySQL

Experience unmatched stability, scalability, and security with Percona's MySQL alternative. Benefit from enhanced performance, quick bug fixes, and enterprise-grade features—all without vendor lock-in.

Percona software for PostgreSQL

A complete, enterprise-grade PostgreSQL solution, integrating the best community components, all designed and tested to work seamlessly together.

Percona software for MongoDB

Built on MongoDB Community Edition, Percona delivers enterprise-level encryption, security, usability, backup, and scaling features—typically exclusive to MongoDB Enterprise Advanced or Atlas—all without the cost or restrictions.

Open source tools and solutions

Open source tools for monitoring, automating, and accelerating database processes.

Percona Everest

The first cloud-native, open source platform for automating database provisioning and management on Kubernetes, offering high-performance, cost-effective deployments without vendor lock-in.

Percona Monitoring and Management (PMM)

An open source tool that provides comprehensive observability, monitoring, and management of databases, helping you quickly identify and resolve critical performance issues.

Percona Kubernetes Operators

Deploy and manage enterprise-grade MySQL, PostgreSQL, and MongoDB clusters on Kubernetes across private, public, hybrid, or multi-cloud environments, supporting your cloud-native strategy.

Expert support and services, anytime you need them

Get on-demand or 24/7 expert support and services for MySQL, PostgreSQL, MongoDB, MariaDB, and other open-source databases across any infrastructure—on-premises, cloud, DBaaS, bare metal, virtualized, or containerized. All backed by guaranteed SLAs.

Percona Support

Enhance your team with expert support whenever you need it. Comprehensive, responsive, and cost-effective.

Percona Managed Services

Round-the-clock, 24x7x365 database management at a fraction of the cost of a full-time DBA.

Percona Consulting

On-site or remote consultants to assist with architecture, design, deployment, tuning, and maintenance tailored to your needs.
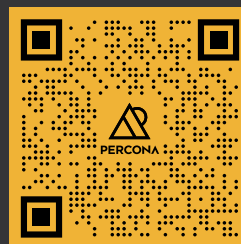

Percona Consulting

Expert-led on-site, virtual, or blended training sessions designed to keep your databases performing at their best.
