- Accommodate rapid growth and application development
- Support unlimited numbers of physical, virtual and cloud servers
- Maximize flexibility and scalability

Percona Unlimited Support provides your company with:

- Excellent performance
- Higher availability
- 24x7x365 SLA's

Bringing immediate, noticeable and long lasting benefits at a price matched to meet your budget and needs.

Percona Unlimited Server Support

Don't waste time counting servers, Percona has you covered!

Growing organizations employ a mix of technologies to make applications and websites deliver the needed business results. This often leads to a variety of databases running on a mix of physical, virtual and cloud servers – all of which need to be monitored, measured and maintained. To complicate matters more, changing business needs and new business goals means spinning up and tearing down databases regularly – especially in the cloud or when using a database-as-a-service (DBaaS).

Counting servers is the last thing you need to worry about when scaling applications and delivering maximum uptime to accommodate rapid growth. Enterprises need an all-in-one plan that covers all their database server technologies and platforms, allowing them to mix, match and change servers as needed, with cost-effective, unlimited server support from the most trusted team of experts in the business.

Stop counting servers!

Percona Unlimited support is a highly responsive, effective, and affordable option to ensure the continuous performance of all your current and yet-to-be deployed MySQL, MariaDB, MongoDB, and PostgreSQL database instances across physical, virtual, cloud-based and DBaaS servers. Percona Unlimited support prevents database and server instability, ensures data recovery, increases performance and response times, minimizes outages and provides proactive systems monitoring and alert responses.

With Percona Unlimited Server Support, you get:

- **Unlimited Servers.** Percona's unlimited server support for all your MySQL, MariaDB, MongoDB, and PostgreSQL servers matches the way you scale and grow your business.
- **Effective help.** Percona's industry-leading technology experts use their full-stack proficiency to help thousands of customers in almost every industry ensure highly reliable, high-performance database infrastructures.
- **Affordable database ownership.** Lower your TCO by combining your MySQL, MariaDB, MongoDB, and PostgreSQL database support needs with a single, enterprise-class vendor, simple contracts, and flexible pricing and payment options that meet your budget requirements.

Our unlimited server support options are designed to meet your requirements and specific needs. Percona Unlimited support is technology-agnostic, so that we can provide you with the best solution for your environment. It gives you a single short and simple support contract for all your database needs, no matter what the platform – with flexible pricing and payment options.

Percona Support
