

# Databases Run Better With Percona

Percona is an open source database software, support, and services company. Founded in 2006, Percona has helped more than 800 customers throughout the world.

Global brands and smaller organizations alike trust Percona to unify, monitor, manage, secure, and optimize their database environments. In short, and most importantly, Percona makes databases run better.

## Open source, enterprise-grade software

*Drop-in replacements for MySQL, PostgreSQL, and MongoDB\*.*

### Percona software for MySQL

The most complete, stable, scalable, and secure open source MySQL software alternatives. Better performance and concurrency for demanding workloads, plus faster custom bug fixes and freely available enterprise-grade features.

### Percona software for PostgreSQL

The best and most critical enterprise-ready components from the PostgreSQL community, in a single distribution, all designed and tested to work together.

### Percona software for MongoDB

Built on MongoDB Community Edition. Includes freely available enterprise-grade encryption, security, usability, backup, and scale features only otherwise available in Enterprise Advanced or Atlas.

## Open source tools and solutions

*Open source tools for monitoring, automating, and accelerating database processes.*

### Percona Monitoring and Management

An open source database observability, monitoring, and management tool to help spot critical performance issues faster, identify root causes, and troubleshoot more efficiently.

### Percona Kubernetes Operators

Support your cloud-native strategy with open source, enterprise-ready MySQL, PostgreSQL, and MongoDB clusters on Kubernetes — private, public, hybrid, or multi-cloud environments.

\* Percona Distribution for MongoDB and Percona Server for MongoDB are source-available software. Percona Backup for MongoDB is open source.

## Expert-led support and services

*On-demand or round-the-clock expert support and services for MySQL, PostgreSQL, MongoDB, MariaDB, and other open source databases. Any infrastructure: on-premises, in the cloud, or in a DBaaS, bare metal, virtualized, or containerized environment. Plus, guaranteed SLAs.*

### Percona Support

Supplement in-house talent with on-demand expertise and guaranteed SLAs. Percona Support is comprehensive, responsive, and cost-flexible.

### Percona Managed Services

24x7x365 database management at a fraction of the cost of a full-time DBA.

### Percona Consulting

Available on-site or remote, Percona Consultants will help with architecture and design, deployment, tuning, and maintenance.

### Percona Training

Percona Experts lead on-site, virtual, and blended classes on keeping databases performant.
